DETAILED ACTION

1. The translation of the Japanese specification filed March 30, 2001 and the verification that it is an accurate translation has been received.

Oath/Declaration

2. The declaration filed under 37 C.F.R. 1.63 in response to the notice of a missing or unsigned declaration has been received.

Specification

3. The disclosure is objected to because of the following informalities: on page 4, line 18 "of" after "micro-bubbles" should be deleted; on page 30, lines 12 and 13 "so suppress increase in resistance due to the negative pressure" is unclear.

Appropriate correction is required.

Election/Restrictions

4. Claims 3-7, 12, 13, and 19-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8 filed December 26, 2002.

Claim Rejections - 35 USC § 112

5. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3617

In claim 11 "the said formed" is unclear.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1, 2, 8-11 and 14-18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Balquet et al.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takahashi et al is cited to show the bubbles formed in the negative pressure region for reducing friction. Japan 2001-55189 is cited to show the low pressure pocket 21 with air introduce into it for forming bubbles.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sherman D. Basinger whose telephone number is 703-308-1139. The examiner can normally be reached on M-F (6:00-2:30 ET).
